

CASUAL

SuperFlex

An orthotic for patients who require one pair of orthotics to wear in the majority of their shoes. Can be worn in most shoes with the exception of slip on dress shoes.

SafetyFlex

Specially engineered for patients who are on their feet all day and need protection in a rugged environment and who require the ultimate in comfort, shock absorption, stability, support and durability.

DRESS

DressFlex

An orthotic designed for patients who require mild to moderate biomechanical control in their slip-on or narrow cut dress shoes. This thin and narrow orthotic slips easily into slim fitting dress shoes.

FashionFlex

An orthotic for women who require support in their narrow high heel pump shoes or in their dance shoes.

SPORTS

SportFlex

A sport orthotic active patients who require increased biomechanical control while on their feet. This orthotic is designed to prevent sport or workplace related injuries by protection against pressure and impact shock.

RunFlex

The Runflex orthotic is specially engineered for the high performance runner/court player. The unique design of this orthotic allows for increased shock absorption and greater directional control for athletes on the run.

SoccerFlex

Designed to prevent sport related injuries by protecting against pressure and impact shock.

CourtFlex

Designed to take pressure off the Achilles Tendon, promote greater ankle dorsiflexion and increase shock absorption.

EagleFlex

The EagleFlex is a suitable orthotic for golfers who require biomechanical balance during their golf swing, as well as comfort and support while walking the golf course.

SkiFlex

A sport enhancing orthotic designed for the avid skier. The Skiflex ensures greater control while on the slopes or on the trails.

SkateFlex

A generic sport orthotic designed to fit ice skates or figure skates. Each Skateflex is cut perfectly to fit into the athletes skate, increasing the comfort of their feet during their time on the ice.
